2320 Marconi Avenue
St. Louis, Missouri
EPA I.D. #MOT300010345

Dear Mr. McGlocklin:

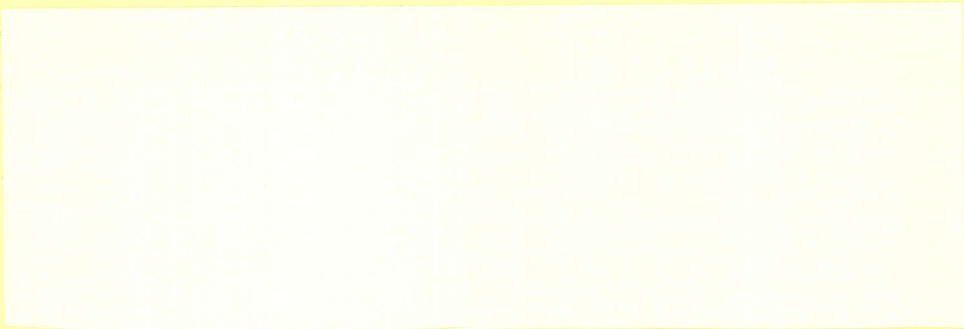

For your information, enclosed is a copy of a letter sent to Sara Evans at the American Bank of St. Louis regarding the Visual Site Inspection (VSI) to be conducted at 2320 Marconi Avenue, St. Louis, Missouri. The VSI is scheduled for 9:00 a.m. on Monday, February 24, 1992.

Please contact Diane Huffman at (913) 551-7544, if you require additional information.

Sincerely yours,

David Doyle

RE: Former SKF USA, Inc. Facility
2320 Marconi Avenue
St. Louis, Missouri 63110
EPA I.D. #MOT300010345

Dear Ms. Evans:

The United States Environmental Protection Agency (EPA) is currently conducting a Resource Conservation and Recovery Act (RCRA) Facility Assessment (RFA) on the above-referenced facility. Although this facility has been decommissioned, an environmental assessment must be performed prior to any final determination being made regarding the facility's interim status. This assessment is referred to as an RFA.

The Hazardous and Solid Waste Amendments of 1984 to RCRA "require corrective action for all releases of hazardous waste or constituents from any solid waste management unit at a treatment, storage, or disposal facility seeking a permit under this subtitle regardless of the time at which waste was placed in the unit" (42 U.S.C. 6924[u]). The RFA is the EPA's program for conducting the required investigation. The RFA is authorized under Section 3007 and 3013 of RCRA.

An integral portion of the RFA is the Visual Site Inspection (VSI) of the facility, which verifies and determines the location of all "Solid Waste Management Units (SWMUs)" and other areas of concern. This letter is to inform you that a VSI will be conducted at this site beginning at 9:00 a.m. on Monday, February 24, 1992. The VSI will be conducted by Terracon Environmental, Inc. (Terracon), an authorized representative of the EPA.

Diane Huffman, of my staff, has spoken with Mr. Bob Andersohn of Andersohn Properties, Inc. about the VSI. Mr. Andersohn has agreed to meet the Terracon representatives at the facility, at 9:00 a.m. on Monday, February 24, 1992. We are requesting that Mr. Andersohn and/or another of your representatives assist Terracon in obtaining access to the site,

to any buildings on the site that they may need to enter as part of their inspection, and to conduct a tour of the site and assist with any questions. No samples will be taken during the VSI. Photographs of each SWMU are to be taken to document conditions at the facility and procedures used.

On the day of the VSI, EPA will be represented by Stacey McCrea-Robertson, (Terracon), and Brad Wohler (Terracon). Don Kerns of the Missouri Department of Natural Resources will also be attending the VSI. Enclosed are descriptions of the above mentioned Terracon staff. In the event that snow is covering the ground at the facility, the VSI may be rescheduled.

If you have any questions, please contact Diane Huffman at (913) 551-7544.

Sincerely yours,

David Doyle
